## **WHAT IS POWDER COATING?**

Powder coating is an environmentally friendly dry powder that is electro-statically charged to bond with metal. The metal must be baked in an oven to allow the powder to melt and fuse with the metal. This type of painting is far more durable and resists wear, chipping, cracking, and peeling much better than traditional painting processes.

In house sandblast facility

## **Metals able to be powder coat:**

- Aluminum
- Stainless Steel
- Copper, Brass
- Galvanized Metal
- Steel
- and more!

State of the art equipment

## **Highest Grade of Powder Material Offered:**

- Salt Resistant
- UV Resistant
- Impact Resistant
- Chemical Resistant

## **Capabilities:**

- Oven Booth 9' x 9' x 26'
- Powder Booth 10' x 10' x 26'
- Sandblasting 10' x 10' x 24'

No job to big or small
